EDUCATION

Gandhi Institute of Technology and Management — Vizag, India
Master of Technology in Computer Science and Engineering; GPA: 8.1 — *April 2024*

Dr. NTR College of Food Science and Technology — Bapatla, India
Bachelor of Technology in Food Technology; GPA: 7.0 — *August 2022*

SKILLS SUMMARY

- Languages: C++, Java, Python, HTML, CSS, JavaScript, React JS
- Frameworks: SpringBoot, Hibernate, Django, Flask,
- Tools: Jupyter Notebook, Visual Studio Code, GitHub
- Soft Skills: Dynamic, Excellent communication and Zeal to learn new skills.

PROJECTS

A Smart Air Pollution Detector Using Machine Learning — **Dec 23 - Feb 24**

- Developed a Flask-based web application to detect air pollution levels in real time, integrating four supervised machine learning models like Logistic Regression, Random Forest, Decision Tree, and CatBoost to compare and optimize prediction accuracy.
- Achieved 92%+ model accuracy on test data by applying robust data preprocessing techniques, including outlier handling, normalization, and feature selection using correlation matrices.
- Built a modular ML pipeline for end-to-end data ingestion, model training, prediction, and result visualization using libraries such as Pandas, Scikit-learn, and Matplotlib.
- Deployed the application with an intuitive web interface, improving user engagement and enabling real-time input and feedback for pollution level detection. Reduced model latency by 40% through hyperparameter tuning and performance profiling, ensuring faster response times for predictions.
- Collaborated in a small team of 2–3 members, showcasing strong communication and full-stack development skills from backend ML integration to frontend UI design.

Smart Task Manager – Full Stack Web Application — **Jan 24 – Mar 24**

- Developed a task management system using React JS (frontend) and Spring Boot with MySQL (backend), enabling users to create, update, and track tasks with status, priority, and due dates.
- Built secure REST APIs with Spring Boot and implemented JWT-based authentication and role-based access using Spring Security.
- Designed a responsive UI with React, integrated dynamic filters and views, and connected to backend APIs using Axios for real-time data operations.
- Achieved 90% test coverage with JUnit and Mockito, and optimized backend queries using JPA/Hibernate for better database performance.
- Used Git/GitHub for version control and deployed the app on Heroku/AWS, incorporating CI/CD for efficient and automated deployment.

CERTIFICATES

Programming in Python (Meta)

- Mastered fundamental Python syntax, proficiently utilizing control flow, loops, functions, and data structures.
- Acquired expertise in procedural programming paradigms and associated logical concepts, enhancing capabilities.

Introduction to Data Analyst (IBM)

- Learned about the data ecosystem, including the ETL process and big data basics.
- Mastered data gathering, identification, and cleaning for analysis preparation.

Foundations: Data, Data, Everywhere (Google)

- Developed a comprehensive understanding of the data life cycle and various stages involved in the data analysis.
- Introduced diverse applications designed to streamline and optimize the data analysis journey, enhancing efficiency and accuracy.
